1. Combination

Reaction. A reaction in  
which two or more  
reactants combine to  
form a single product is  
known as a  
combination reaction.

**Types of Chemical  
Reactions - Detailed  
Explanation With ...**

# Acces PDF Types Of Chemical

The five basic types of  
chemical reactions are

combination,  
decomposition, single-  
replacement, double-  
replacement, and  
combustion. Analyzing  
the reactants and  
products of a given  
reaction will allow you  
to place it into one of  
these categories. Some  
reactions will fit into  
more than one  
category.
