Universe Designer Guide

Universe design tool provides a graphical interface that allows you to select and view tables in a database. The database tables are represented as table symbols in a schema diagram. You can use this interface to manipulate tables, create joins that link the tables, create alias tables, contexts, and solve loops in your schema.

SAP Universe Designer - Quick Guide - Tutorialspoint

In SAP Netweaver, being a Business Objects component, a Designer is used to build universes. A universe is a semantic layer between database and end users. The role of a universe is to provide an easy to use and understand interface for non technical Business Objects and Web Intelligence users to run queries against a database to create reports and perform data analysis.
